

# AWS Lambda Course

2017, November, 03 11:08 AM

Github: <https://github.com/spruke/doggos/tree/master>  
<http://queryfeed.net/>

Use get vs post to maintain cacheability

- 1) Create AWS account
- 2) Install amazon command line tool
- 3) Aws configure
- 4) Switch to US proxy to get access to AWS

Need to get role ARN from IAM site on aws console

Not usefule for infrequently used APIs

- Container only exists for 5-30 mins
  - o Calling things infrequently will cause containers to be need to be spun up often

Lambda has a 5 minute timeout

- Needs to be quick operation
